nothing. It is the Free Art School for Women in Cooper Union.

The present arrangement will not permit more than two hundred and seventy-five to receive the benefit of this gratuitous course. Fully two hundred and fifty are waiting for a chance to get in. The whole course embraces four years. Those who are admitted have only to register each new term. The applicants who come too late have the precedence in following years if they apply again.

Three conditions are exacted in those who seek to profit by old Peter Cooper's benevolence-moral character, some aptitude for art and an inability to pay for instruction in it. It is also law that youthfulness below sixteen, or a maturity on the shady side of thirty-five, renders one ineligible. Under sixteen they are supposed to require more practical branches than asthetical ones, and over thirty-five they are believed to have no very striking talent, since it has not stirred in them before. The Free Art School for Women in the old

brown-stone Cooper Union aims at equipping young women of reduced circumstances with the means of earning an bonest livelihood. The pupils receive a full course, including drawing from the casts, a life school, painting in oil and water-colors, touching up

negatives, finishing photographs, designing for the industrial arts and wood-engraving.
The greater number of applications are for
the antique and life school.
The larger number of the pupils start in

The larger number of the pupils start in with a most comprehensive ignorance of art. After two months studies, beginning with the very rudiments, if the young woman fails to show some merit, she is gently dropped to give room for a worthier applicant.

The Cooper Union graduates get very good positions, in many instances, as teachers of drawing and painting in academies and normal schools. Their salaries range from \$1,200 to \$1,500 a year. Those who get to be skilful in "doing" photographs receive

Mrs. Schuyler kindly took a World reporter through the rooms to see how the work was conducted. In several of them young women were seated at easels making copies of casts. One evening on coming home to dinner her husband handed her, with a triumphant smile, a large, official-looking envelope, saying: "Well, my dear, here is something that will surely please you."

It was an invitation from the Minister of the Interior to a ball which His Excellency was about to give at the Ministry.

Instead of being delighted, as her husband had hoped that she would be, the poor girl threw the unlucky invitation on a side table, with every token of disgust and vexation, saying: "West am I to do with that?"

"But, my dear," he replied, "I thought that you would be so pleased. You are always complaining of not going in society. This is a magnificent opportunity of doing so, I assure you. I had the greatest difficulty in obtaining this invitation, and I went to all the trouble of doing so only in the hope of giving you pleasure."

"And what am I to wear if I do go?" asked fined tastes and aristocratic inclinations, Thoroughly disheartened, she married a junior clerk in the Treasury Department.

She suffered bitterly, however, for she felt that she was born for a life of luxury and enjoyment, and chafed continually under the more than commonplace nature of her new surroundings, which were hardly better than her old ones.

To live in dingily furnished lodgings was to her a torture. Everything around her jarred on her feelings of refinement and on her violent longings for elegant luxury, while the meagre dinners, caten on a coarse tablecloth, out of common chinaware, and that she was born for a life of luxury and en-

Why Girls Object to be Nurses.

[From Harper's Baser.]
The prejudice against adopting this most useful rofession in America to-day seems based upon wo objections-first, the necessity of an apprenticeship of systematic work; secondly, the fear of losing caste. All professors and teachers in training schools agree, we believe, in an opinion that the American woman is greatly shead of her English companion in class, in quickness, and what may be called class knowledge, but lacks much that relates to discipline, and requires a constant stimulant of excitement or praise. She therefore is apt to illustrate the old theory of the tortoise and the hare. It is hard work for her to be content with uneventful progress, and unfortunately she is inclined, after a few months of study, to decide in favor of the medical profession as affording her a wider field for her ability. But would it not be better to adopt the foreign point of view in this question? Consider how dignified and useful a woman's position may be as superintendent of a hospital, in which all her most womanly instincts as well as her very highest mental capacity may be brought into play. In regard to the second point, as one of the most successful head nurses recently said to us, "The position does not elevate a woman sociality if she be unfit for it, but a woman siready well placed socially can lose nothing—rather will she gain by dignifying the place she fills." And we may add, in conclusion, another quotation from Florence Nightingale's careful piece of advice to those in her charge: "The read dignity of a gentlewoman is a very high and una-saliable thing, which silently encompasses her from her birth to her grave."

Deeply chagrined beyond all expression, the unfortunate husband asked tremulously: "Look here, Rénée, how much would a pretty but simple dress cost? Something that you might be able to wear again on similar occasions?"

A blush of pleasure mantled her face, and after reflecting for a few moments she said hesitatingly: "I am not quite sure, but I think that it might be done for 400 francs."

He turned slightly pale, for this was just the sum which he had set aside with great difficulty to buy himself a gold watch. He replied, however: "All right, you shall have 500 francs; but try and get a handsome dress for the money, as it will be a long time before I can buy you another one."

As the great day drew near Renée, although her dress was finished and was very pretty, began to look sad and downhearted again.

Her husband having inquired as to what might be her new trouble, she acknowledged rather shamefacedly that she was deeply humiliated to have to go the ball without a single jewel to wear.

Living in a college town and having opportunity REMARKABLE STORY OF THE PROWESS OF to observe both young men and young women, I can honestly say that the sacrifices here made by young women for the sake of knowledge are greater, their opportunities of ald far less, than those of young men. It has been repeatedly said ing Boxing and Wrestling Exhibition of by the very able head of the university that the only way to keep down the rent of rooms is to have the Nassau Athletic Club-A Cocking Main Between Brooklyn and Newark college dormitories, since the open competition in the community would not reduce them sufficiently. the community would not reduce them sufficiently. For this purpose a new dormitory, larger than any now existing, is soon to be erected. All this for the thoughd young men, but for the hundred young women no such provision is made, and they must still obtain their rooms by that open competition which is found insufficient for economy in case of their brothers. Again, there is for young men a public or commons table, where the expense is not expected to exceed \$4.50 per week, whereas there is for women nothing of the kind. In both these respects, their forc, the expenses of a young girl studying at Cambridge is almost inevitably greater than those of a young man, and it can har in eclaimed that her other personal exp uses are less than his. claimed that her other personal exp ness are less than his. In point of dress her outlay must inevitably be greater.

Mirs. Siddons is reported to have said, when approaching death, that she hoped yet to live in a world where some justice was done to women. If this could be said by one of the most admired members of that profession in whice women are more nearly equal with men than in any other, what can be said by these who in youth and inexperience simply wish, modestly and unobtrusively, to be allowed to study. This description applies, as a rule, to the young women who come to college for education. The class of those who come simply to smuse themselves, or because it is "the taling" to come—this class, so largely represented among men, finds very few representatives among women. These least enter college, if a tail, either from love of study or from the necessity of self-support. In either case it is not merely ungenerous, but unmanly, to eave them struggling with greater obstacles than men encounter. If they learn less casily—which nobody pretends—they should be helped the more, not the less. But to call upon them to undergo greater privations, to economize more strictly, to receive less help than their brothers—this is something more than unmanly or ungenerous. In the words of Dickens's dissatisfied prize-fighter: "It's mean, you know; that's where it is—li's mean!" you ever saw, Pete, he said; "weighs just 896 pounds in fine condition. to his weeping wife, "that you have broken the clasp of her necklace, and that you are having it mended. This will give us a few days to look round, and to see what is to be done."

A week clapsed and the poor young couple lost all hope of ever recovering the missing necklace. Renee was thoroughly ill, and her husband looked at least ten years older than before their misfortune. The only thing to be done was to buy another necklace and send it to Mme. Forestier. But how could they do it! They went from jeweller to jeweller, and found a necklace at length which was exactly similar to the lost one. It cost 40,000 francs.

Their entire fortune amounted to only half this sum. They borrowed the rest from money lenders at enormous rates, giving their signatures and engaging their whole future, and at last, after a forting, but of future, and at last, after a forting, but of future, and at last, after a forting, but of future, and at last, after a forting, but of future, and at last, after a forting, but of future, and at last, after a forting, but of future, and at last, after a forting, but of future, and at last, after a forting, but of future, and at last, after a forting, but of future, and at last, after a forting, but of future, and at last, after a forting, but of future, and at last, after a forting, but of future, and at last, after a forting, but of future, and at last, after, a forting, but of future, and at last, after a forting, but of future, and at last, after, a forting, but of future, and at last, after, a forting, but of future, and at last, after, a forting, to favore the future, and at last, after, a forting, to favore the future, and at last, after, a forting, to favore the future, and at last, after, and future the future of the future, and at last, after a forting, to favore the future of the future, and at last, after a forting, to favore the future of the future of

Rênée, however, went to the glass to give one more admiring look at all her finery, when suddenly she uttered a scream of horror.

The diamond necklace was gone!

Her husband and herself, both as pale as death and trembling from head to foot, searched the rooms, the staircase, their own pockets, to no avail. The jewel was nowhere to be found. Unfortunately they did not remember the number of the cab which they had taken.

In despair the poor husband dressed himself again and went back to the Ministry to see if the necklace had been drepped there. He returned at 7.30 o'clock, broken-hoarted and worn out.

He had made inquiries at the police station, and notices inserted in the daily papers, promising a bandsome rewardif the diamonds were returned to him, but he asknowledged that he had little hopes of ever seeing them again.

"You must write to your friend," said he "You had taken had little hopes of ever seeing them again.
